Anatomy of a Bristol Cable Termination Valve

Solid Core, Micro-Polished, Lubricated Steel Cable

Reduces the force required to open and close the valve.

Larger Diameter Cable

Makes operation easier and provides a tight valve seal.

Crush Resistant, Self-Lubricated Sheathing

Protects the cable and makes operation easier to ensure a tight, leak free paddle seal.

100% Factory Tested for a Reliable, Leak Proof Assembly

Teflon Coated Valve Seals

Makes opening and closing easier and ensures a tight and reliable long lasting seal.

Easy Grip Handle

Easy to pull and operate the valve.

The Only RV Termination Valve Made in the USA

Made In The USA

LaSalle Bristol offers a complete line of Termination Valves and Accessories for Recreation Vehicles. Proudly made in the USA for over 40 years. All Bristol termination valves and accessories are C-NSF approved.

Cable Actuated Waste Valves

Bristol waste valves with cable extension handles allow for greater flexibility of valve and handle placement on the RV.

Contact your LaSalle Bristol representative for other cable lengths and design possibilities.

14" - 150" cable lengths available on single and dual valves.
