

### **Interlocking Design.**

Finium's interlocking design uses precision-milled wood panels that fit together like puzzle pieces, creating a continuous surface without visible nails or gaps for a clean, architectural look. Each panel locks into the next along its edges, which speeds up installation and helps maintain consistent spacing and alignment across the wall.

### **The One and Only. Bold by Design.**

Finium is a Canadian company active in North America and Europe. Innovative architects and designers have incorporated Finium premium products into thousands of projects over the past 20 years.

### **An Innate Sense of Design.**

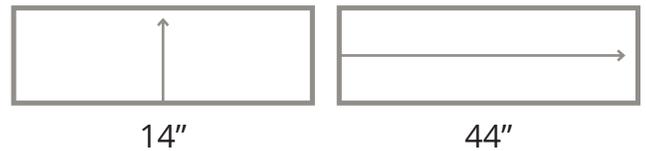

It is not just about the intrinsic qualities of Finium products—it's about the impact they will have in a space. Finium taps the potential of both light and raw materials to add warmth, richness, texture, and depth to your design.

### **Great Concept Meets Great Performance.**

Finium believes that design and manufacturing go hand in hand, allowing them to create one-of-a-kind products and manufacture them in record time. Finium painstakingly pays impeccable attention to the look, finish, and durability of every product we produce.

## SPECIFICATIONS

## SPECIES

Maple

## THICKNESS

8.5mm and 10mm

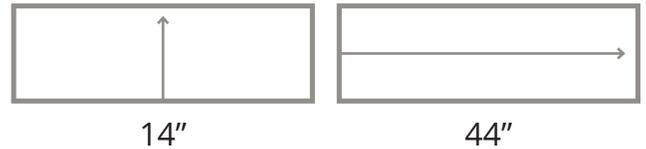

## FINISH

10% UV gloss varnish, low VOC,  
antimicrobial protection.  
Available with Class A fire treatment.
