

PALISADE™

Waterproof, Grout-Free Wall Tiles

WHY CHOOSE PALISADE®

The Palisade Shower System is easy to install and provides an elegant finish to showers and bathrooms. The unique tongue and groove connections interlock seamlessly without the need for transition pieces while coordinating trims further simplify the installation process — even when walls are not perfectly square. Palisade panels are waterproof, made of PVC and come in neutral style options that complement a variety of decors.

FEATURES & BENEFITS

EASY

Palisade tiles are engineered with a tongue and groove system that simplifies installation and locks together to guarantee a tight seam.

DURABLE

Palisade tiles are made with revolutionary RCB technology (Rigid Core Board). This unique and patented technology ensures that the boards are extremely durable, water-proof and impact resistant.

STYLISH

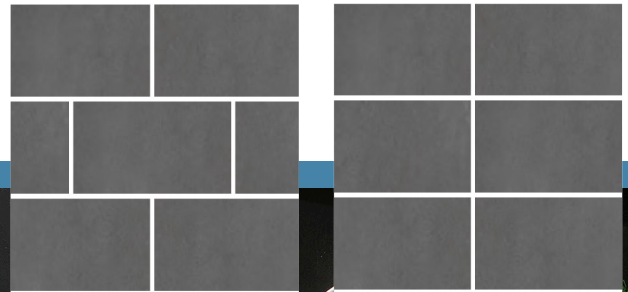

Palisade has the appearance of genuine wall tile with micro-grout lines that can be seen and felt. Palisade comes in neutral style options to match various decors.

APPLICATIONS

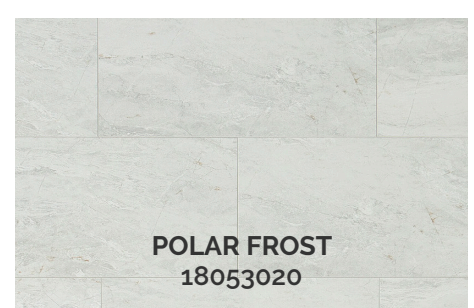

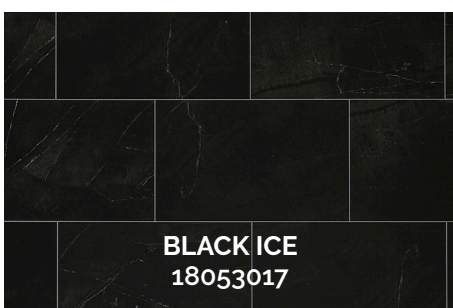

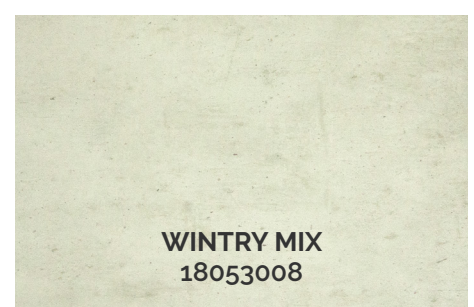

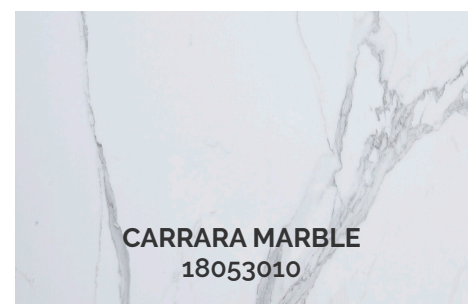

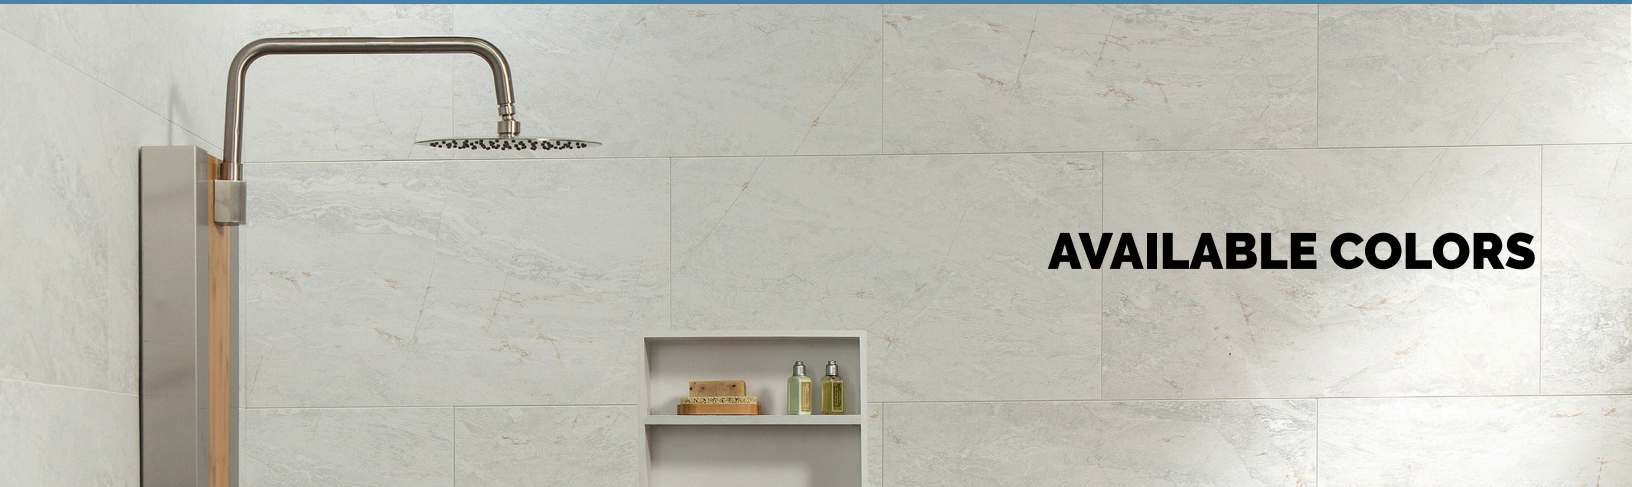

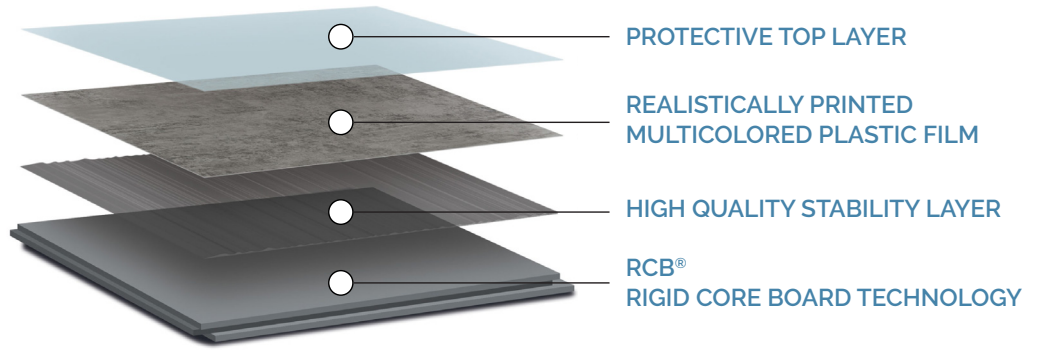

- Bathrooms and showers
- Accent walls
- Kitchens
- Laundry rooms
- Hobby rooms

LAYOUT OPTIONS

CONSTRUCTION

Palisade tiles are made with revolutionary RCB® (Rigid Core Board) technology. This unique and patented technology ensures that the boards are extremely durable and water-proof.

INSTALLATION

Palisade's engineered tongue and groove connections simplify installation.
